Summer

Around Nendaz there are approximately **250 kilometres of hiking trails**, a network of paths running from the orchards in the valley up to the high Alps. A particular highlight is the excursion by cableway or mountain bike to the glacier **Mont Fort**, with its **expansive view of 20 four-thousand-metre peaks, including the Matterhorn and Mont-Blanc.**

Owing to the dry climate of the Valais, farmers built a system of irrigation channels across the region centuries ago. **Nendaz has the biggest network of these 'suonen'**, some of which are still used, and **98 km of footpath now run along 8 of them.** As one of the biggest raspberry and apricot growing areas in Switzerland, Nendaz has dedicated one of the local themed trails to fruit growing. There is also a hike to some of the **biggest larch trees in Europe** on the Balavaux Alp (Isérables) or, if you have a taste for the exotic, take a stroll through the **Japanese Garden.**

Winter

Nendaz lies in the heart of the '4 Vallées' ski region (Verbier, Veysonnaz, Nendaz, La Tsumaz & Thyon) with 92 transport facilities and **412 km of slopes**. It is **the biggest ski region** in Switzerland. There are also off-piste activities with 12 km of cross-country ski trails, 100 km of winter hiking trails and 40 km of showshoe tracks.
